

Chemistry and Biochemistry Department

Masters of Science Degree

The Master of Science degree in Chemistry provides a comprehensive understanding of the principles of chemistry and application in detail to advanced problems.

Understanding is gained through:

- Course work
- Seminar
- Independent Study
- Research

The program is designed to provide the student with the necessary skills and techniques to reach the applicant's particular objective. Whether it be for a successful career in teaching, industry, or to pursue further graduate work.

The students in this program may pursue areas of research including:

- Analytical
- Inorganic
- Organic
- Physical Chemistry
- Biochemistry

For program details and additional information please contact:
